

Binary IR Cab Owner's Manual

HOTONE
DESIGN INSPIRATION

Welcome

Congratulations on your new Hotone Binary pedal! You have just added some serious power to your pedalboard.

The Binary series lets loose versatile pro effects in compact cases. A dual-DSP powered platform and CDCM modeling system ensure a realistic playing experience, dual-footswitch design and variable I/Os make it easy to use, and an OLED screen offers clear, detailed display.

Binary IR Cab is an Impulse Response based cabinet simulator delivering precise legendary vintage/modern guitar/bass cab sounds along with CDCM powered legendary studio microphone/power amp simulations.

Features

- ★ Grown out of next-gen XTOMP technology
- ★ Compact, easy-to-use dual footswitch IR cabinet simulator pedal
- ★ Advanced CDCM modeling system ensures realistic playing experience
- ★ Dual DSP-powered platform ensures high sound quality
- ★ 24-bit A/D/A conversion, up to 110dB S/N ratio
- ★ 100 legendary cab models
- ★ 10 CDCM based legendary studio microphone simulations
- ★ Detailed mic position (X, Y, Z) and room simulations
- ★ 8 CDCM based power amp simulations with presence control
- ★ Supports 3rd party IR files
- ★ USB jack for firmware upgrading, loading/managing IRs with free PC/Mac software
- ★ Aux in and headphone output for practicing and jamming
- ★ 100 Presets
- ★ Built-in OLED screen with clear display
- ★ 5 transparent knobs with LEDs
- ★ 9V DC power supply

Panel Introduction

- 1-2. ▽/△: For selecting presets, bypass/mute, and other parameters.
3. +/- buttons: For selecting effects and adjusting parameters.
4. GLOBAL: For power amp and room control settings.
5. SAVE/EXIT button: For saving or canceling parameter changes.
6. OLED screen: Shows bank/patch numbers, setting values and other operation info.
7. VOL: Controls effect output level.
- 8-10. MIC POSITION X/Y/Z: Controls the mic position simulations.
11. MIC POSITION: Selects (or turns off) different microphone simulations.
12. INPUT: 1/4" (6.35mm) mono jack, for plugging in instruments or other effects.
13. AUX: 1/4" (6.35mm) stereo jack, for plugging in audio players.
- Note: You can hear only left channel signal when using along with OUTPUT jack.
14. PHONES: 1/4" (6.35mm) stereo jack, for connecting headphones.
15. OUTPUT: 1/4" (6.35mm) mono jack, for connecting to audio interfaces, mixers or other effects.
16. USB jack: Mini USB jack, for effects editing, firmware updates, and factory reset.
17. DC 9V: Plug in your power supply here (DC 9V, center negative).

Connections

Note: TURN ON FIRST, TURN OFF LAST. Always mute the mixer/audio interface before plugging or unplugging power jacks, cables, etc. When you're using a mixer or an audio interface, please adjust the onboard knobs carefully to avoid signal clipping.

Display

Plugging in your power supply will turn on the device. The main display will come up as shown below:

- 1 - Current bank/patch number
- 2 - Indicates the cab model you're using in current patch

Select a Patch

Tap either ∇/\triangle footswitch once to change patches (hold one footswitch to switch patches quickly). Tap \triangle footswitch repeatedly to cycle through patches in the order 00, 01, 02, 03, ..., 99, then 00. Tap ∇ footswitch to change patches in the opposite order.

Bypass/Mute

Tap both ▽/△ footswitches at the same time.

To set the unit to bypass: release the footswitches within 2 seconds.

To set the unit to mute: hold the footswitches more than 2 seconds until "MUTE" appears on the screen.

Tap both ▽/△ footswitches again to go back to normal.

In Bypass/Mute status, all the LED knobs will go out.

Note: AUX IN will not be muted in MUTE status.

Edit

1. Adjust the parameters

Use the onboard knobs to adjust the effect parameters. The screen display will be shown as below when adjusting:

1 - Current parameter value you're adjusting (shown: volume)

2 - Saved parameter value in the current patch (PREV. = Previous value)

The MIC POSITION X/Y controls the microphone horizontal/vertical position, set $X=Y=0$ to set the microphone on axis; Z controls the distance between microphone and speaker cap.

The MIC TYPE lets you select a microphone type you like. Turn this knob to minimum to turn off microphone simulation.

Edit

2. Select a different effect

Use the +/- button to change to another cab sim (hold for fast changing):

The inverted bank/patch number indicates that the current patch has been edited.

Edit

3. Adjust power amp and room settings

In main display, press the GLOBAL button to edit the power amp in the current patch. Press the GLOBAL button repeatedly to cycle through power amp type, presence, room amount settings and firmware version info (after firmware v1.1.1 update):

Use the +/- buttons to set the power amp type (or turn power amp sim off)/power amp presence/room amount (or turn room simulation off). Press the SAVE/EXIT button (or wait for 3 seconds without any operation) to confirm settings and exit to the main display.

Note: If you change to another patch before saving your edits, all your changes will be lost. Save the patches to keep your changes.

Save

Hold the SAVE/EXIT button to activate save function. The screen will be shown as below:

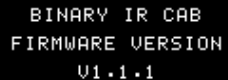

Use the +/- buttons to choose a location (hold one button to choose quickly). Tap the SAVE/EXIT button to confirm saving. Press either footswitch to cancel saving and go back to edit status.

Check Firmware Version

You can check firmware version on your Binary IR Cab after updating to firmware v1.1.1 or later.

To check firmware version, press GLOBAL button repeatedly until the firmware version info is displayed on the screen:

```
BINARY IR CAB  
FIRMWARE VERSION  
V1.1.1
```

Cab Models List*

No.	Name	Description	Speaker Size
Quickstart			
1	BRIT LEAD 4x12	This IR is based on a Marshall 1960AV* 4x12 cabinet with four 12-inch Celestion Vintage 30* speakers.	4x12
2	USA RECT 4x12	This IR is based on a Mesa/Boogie Rectifier* cabinet with four 12-inch Celestion Vintage 30* speakers.	4x12
3	VOXY TB 2x12	This IR is based on a Vox AC30 Top Boost* cabinet with two 12-inch Vox*-labeled silver speakers.	2x12
4	DARK DUO 2x12	This IR is based on a Fender ' 65 Twin Reverb* cabinet with two Jensen C12K* speakers.	2x12
5	BRIT TRAD 4x12	This IR is based on a vintage '68 Marshall* Basketweave 4x12 cabinet with four 12-inch Celestion Greenback* speakers.	4x12
6	DARK LUX 1x12	This IR is based on a Fender Vibrolux* 1x12 cabinet with one 12-inch custom speaker.	1x12
7	TWD LUX 1x12	This IR is based on a Fender Tweed Deluxe* cabinet with one 12-inch Jensen P12R* speaker.	1x12
8	JAZZ TWIN 2x12	This IR is based on the legendary "Jazz Clean" cabinet with two 12-inch "Silver Cone" speakers.	2x12
9	CHEF MIX 2x12	This IR is based on a Matchless* 2x12 cabinet with one 12-inch Celestion G12H* speaker & and one 12-inch Celestion G12M* speaker.	2x12
10	BASE MAN 4x10	This IR is based on a Fender '59 Bassman* cabinet with four 10-inch Jensen P10Q* speakers.	4x10
Modern Selections			
11	BRIT T75 4x12	This IR is based on a Marshall 1960B* cabinet with four 12-inch Celestion T75* speakers.	4x12
12	BRIT MOD 4x12	This IR is based on a modified 1970's Marshall 1960TV* 4x12 cabinet.	4x12
13	BRIT GRN 4x12	This IR is based on a Marshall 1960A* cabinet with four 12-inch Celestion Greenback* speakers.	4x12
14	BRIT JUBY 2x12	This IR is based on a Marshall 2550* 2x12 cabinet with two 12-inch Celestion Greenback* speakers.	2x12
15	BRIT JUBY 4x12	This IR is based on a Marshall 2551* 4x12 cabinet with four 12-inch Celestion Greenback* speakers.	4x12
16	BOG V30 4x12	This IR is based on a Bogner* 4x12 cabinet with four 12-inch Celestion Vintage 30* speakers.	4x12
17	GER V30 4x12	This IR is based on a ENGL* 4x12 cabinet with four 12-inch Celestion Vintage 30* speakers.	4x12
18	GER TRIP 4x12	This IR is based on a Hughes & Kettner* Triamp* cabinet with four 12-inch Celestion Greenback* speakers.	4x12
19	UBER 75 4x12	This IR is based on a Bogner* Uberkab* cabinet with four 12-inch Celestion T-75* speakers.	4x12
20	UBER MIX 4x12	This IR is based on a Bogner* Uberkab* cabinet with two 12-inch Celestion T-75* speakers and two 12-inch Celestion Vintage 30* speakers.	4x12
21	DIZZ V30 4x12	This IR is based on a Diezel* 4x12 cabinet with four 12-inch Celestion Vintage 30* speakers.	4x12
22	SOLO 100 4x12	This IR is based on a Soldano* 4x12 cabinet with four 12-inch Eminence V1216* speakers.	4x12
23	AREA 51 2x12	This IR is based on a Peavey* 5150* cabinet with two 12-inch Sheffield 1200* speakers.	4x12
24	AREA 53 4x12	This IR is based on a EVH 5150 III* cabinet with four 12-inch speakers.	4x12
25	AREA 65 4x12	This IR is based on a Peavey 6505* cabinet with four 12-inch Sheffield 1200 speakers.	4x12
26	USA TRAD 4x12	This IR is based on a 1980s Mesa/Boogie* cabinet with four 12-inch Celestion Vintage 30* speakers.	4x12
27	USA LEAD 4x12	This IR is based on a Mesa/Boogie* 4x12 cabinet with four 12-inch Celestion Classic 80* speakers.	4x12
28	USA KING 4x12	This IR is based on a Mesa/Boogie Road King* cabinet with four 12-inch Mesa/Boogie "Black Shadow" * speakers.	4x12
29	OGRE V30 4x12	This IR is based on an Orange PPC412* cabinet with four 12-inch Celestion Vintage 30* speakers.	4x12
30	CAVE LEAD 2x12	This IR is based on a Carvin Legacy* 2x12 cabinet with two 12-inch Celestion Vintage 30* speakers.	2x12

Specifications

Number of Patches: 100

Number of Effects: 100 cabs, 8 power amp types, 10 mic types

Digital Processing: 24-bit A/D/A conversion, 48 kHz sample rate

Supported IR file format: 24-bit, 48kHz

Max. Truncation Time: 20ms

Frequency Response: 20 Hz-20 kHz

S/N Ratio: Up to 110dB

Input Impedance: 1M Ohms

Output Impedance: 100 Ohms

Power Requirement: DC 9V, center negative

Current Consumption: 200mA minimum

Dimensions: 121mm (D) x 72mm (W) x 47mm (H)

Weight: 340g
